Keep it going

Using projectors while teaching

Noting

Abhinandan sir should improve their teaching

Complete notes will be provided by faculties , so students will not go to library or search or go through other resources as everything will already be given. Students should learn to search the concepts in varies books and be capable of preparing their own notes in theory subjects . Atleast for 1 chapter students should search and see in other resources , atleast for that reason they will go through other books

Institute should provide more soft skills teaching to the students. The students should be taught with real life example and its application. Institute should focus on students mentoring because many of the students dont know the exact path where they should lead the life. Encouragement should be given for extra curricular activities and so on..

Apart from studies, guide students for their future career and about new technology or trends

Should not teach many topics or concepts which would be difficult for us to digest or understand....Written works given must be reduced if it could be....[not all the time] if every teacher makes up their time and wishes to ask about our problems or difficulties then it would be helpfull...["some"of our lectures also do it]
